

COMPANY  
PROFILE

**A COMPLETE RANGE  
OF CONSUMABLES  
AND SERVICES  
FOR WELDING,  
HARDFACING  
AND CLADDING**

**For over forty years, DAIKO SRL has been a reference point for welding consumables able to guarantee compliance with the most stringent technical and quality requirements characterizing the main industrial segments.**

Born with a specific focus on corrosion resistant alloys, over the years, DAIKO has developed a complete catalog for all welding applications including SMAW, GTAW, GMAW, FCAW, SAW and ESW, created and developed thanks to a careful selection of raw materials and continuous synergy with the most renowned and qualified international producers.

A strong asset of the company is the large stock which guarantees fast deliveries and precise supplies to customers.

We are a reliable partner, qualified by important and prestigious customers all over the world active in the oil & gas, chemical and petrochemical industry, in the production of pressure vessels, valves and in general wherever reliable and high-quality welding consumables are required.

DAIKO strives to meet the needs of its customers ensuring reliance on a welding partner who makes their work efficient and productive by optimizing time, reducing costs, and maximizing quality.

## OUR VALUES

Quality for DAIKO is the sum of many aspects, starting from the technical excellence of the products without neglecting any management aspect.

### SUSTAINABILITY

01

DAIKO is strongly committed to the protection and promotion of the health and promotion of its collaborators and the environment in which they operate. Among its main objectives there is certainly that of safeguarding the environment in a context of social and economic growth: sustainable development means knowing how to satisfy the needs of human beings without compromising the possibility that future generations can do the same. For this reason DAIKO has embarked on a path of alignment of its procedures with the stringent management standards ISO 9001, ISO 14001 and OHSAS 45001 with the aim of offsetting its global electricity consumption with 100% renewable energy by 2028.

### AUTHENTIC PARTNERSHIP

02

DAIKO's approach to customer needs considers all aspects of the supply, in addition to those strictly related to the technical characteristics of the product. Our precise document quality management and reactive logistics make us a partner you can refer to. DAIKO is able to carry out, in collaboration with the main third parties, mechanical and chemical characterizations and to intervene in the production phase on the basis of the customer's specifications. DAIKO technicians are also able to help the customer in the feasibility analysis and in identifying the best solutions.

### TECHNICAL EXCELLENCE

03

All the solutions that fall within the range of DAIKO welding consumables are developed with the precise objective of guaranteeing the best performance in the production and chemical-mechanical performance fields. Products made in state-of-the-art plants and on proprietary specifications leave no room for commercial compromises but rather only expressions of technical excellence. The corrosion resistance, mechanical characteristics and weldability of DAIKO products are in fact at the top of the market and fear no comparison.

### REACTIVITY

04

Aware of the difficulties of complex production processes, DAIKO offers the customer not only a complete range of welding solutions but also a unique availability of materials. The stock of materials ready for delivery places DAIKO at the top of Europe for availability and delivery flexibility. Through the two modern hubs, our logistics is able to effectively and quickly manage all national or international procurement needs.

### INNOVATION

05

Quality in raw materials and production processes combined with continuous research are the basis of DAIKO's approach. The evolution of welding systems and the development of basic materials requires continuous innovation of the characteristics of the consumables and frequent discussions with our customers. Through rigorous tests and partnership programs with the best steel mills, DAIKO transfers the precise desire for continuous improvement to its products. The DAIKO technical department, working for years in close contact with the best steelmakers, has developed a profound product experience that has allowed our Nickel alloys to become an industrial reference point.

We are an Italian testimony of passion for technical excellence and customer service that over the years has made itself known and appreciated thanks to its values all over the world.

**WELDING  
CONSUMABLES**

**EFFECTIVE SOLUTIONS  
FOR EVERY JOINING  
AND CLADDING REQUEST**

**Corrosion  
Resistant  
Alloys  
Specialists**

The DAIKO range of consumables for welding and cladding is the result of constant attention to quality and stringent chemical-mechanical characteristics. Always specialized in applications for corrosion resistant alloys and nickel alloys, with the DAIKOW 625 wire DAIKO has rewritten the industry reference standards. Developed on the basis of a design gained over decades of experience, guaranteed through severe and rigorous tests, DAIKO welding consumables are the ideal solution for every joining and cladding need.

**ON THE CUSTOMER'S SIDE**

Each customer has different needs and expectations based on their production, commercial and logistical needs. DAIKO pays great attention to understanding these often overlooked aspects and is able to propose customized solutions based on individual customer requests. Within the vast catalog it is possible to find solutions for every need and welding requirement. Do not hesitate to contact us to evaluate together the most suitable solution for your needs.

**MAINTENANCE SOLUTIONS**

**DURABLE SOLUTIONS FOR EVERY MAINTENANCE AND HARDFACING NEED**

**Innovative Maintenance Consumables & Services**

A range of welding consumables optimized for the industrial maintenance sector, specifically developed for the repair of mechanical parts used in the most varied process sectors and in the repair of manganese steels, high carbon steels and cast iron. Over the years, DAIKO has also developed the best welding consumables for the realization of hard coatings, heat-resistant coatings and for all the needs of anti-wear surfacing.

**MAINTENANCE SERVICE**

Thanks to the experience gained over forty years, DAIKO is now able to also produce items in wear resistant plate built to the customer's design such as pipes, curves, cyclones, snails and fans and to provide a complete maintenance and construction service for mechanical parts subject to wear such as shredders, crushing mills, impellers, stellite knives and augers.

## CORROSION RESISTANT ALLOYS SPECIALISTS

The great performances of DAIKOWM 625 wire, gained over many decades of experience, are renowned all over the world by the most demanding users:

- analysis compliant with AWS A5.14, ERNiCrMo-3
- strictly controlled chemical composition for every batch
- Fe content 0.5% max
- high quality and consistent weldability

## OFFICIAL PARTNER DUCATI LENOVO TEAM AND GOLD SPONSOR PIACENZA VOLLEY

“**DAIKOWM 625 is the best GMAW welding wire for joining and cladding multiple industrial components, especially in applications with robotic welding systems.**”

DAIKO, following the passion for sport and an international brand enhancement strategy, is official partner of Ducati Corse in MotoGP and sponsor with Gas Sales Piacenza Volley. The typically Italian technical excellence and attention to team play are in fact deeply rooted in DAIKO's DNA.

## TOTAL QUALITY MANAGEMENT

At DAIKO, professionalism and timeliness are fundamental values that permeate every aspect of our services and products.

To uphold these values, we have implemented an ISO 9001 certified quality management system focused on continuous improvement and customer satisfaction. This commitment is further demonstrated by our approval as a manufacturer of Welding Consumables in accordance with VdTÜV-Merkblatt Schweißtechnik 1153:2017.

Our goal of Total Quality Management is supported by an organizational system that places continuous improvement at the core of every process. This model integrates all company functions and processes, involving every level of the organization—from top management to operators—with the aim of increasing customer satisfaction, reducing waste, improving efficiency, and enhancing the company's competitiveness.
